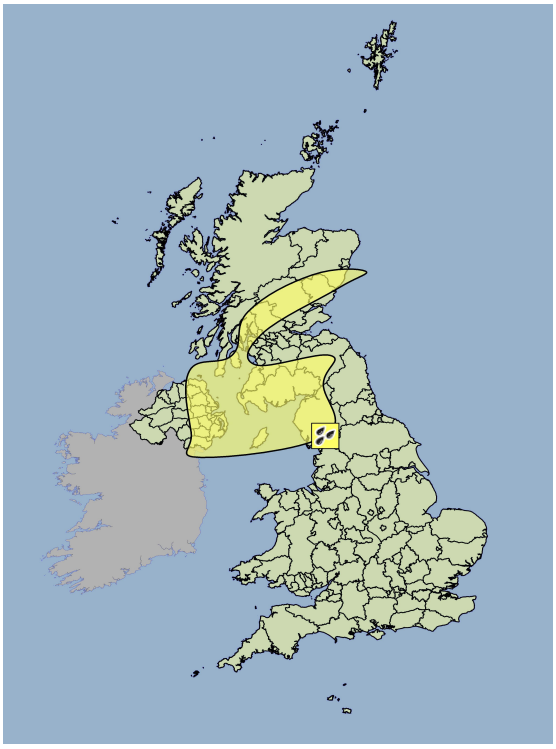
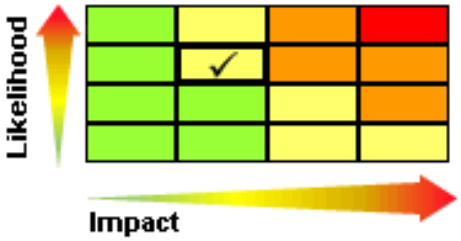
National Severe Weather Warning Service





Chief Forecasters Assessment
Further spells of rain will move eastwards across the area on Wednesday with the risk of a spell of heavy and persistent rain, especially over Scotland during Wednesday afternoon and evening. 10-15 mm is expected to fall quite widely, with 20 mm or more in places. This could lead to further localised flooding, particularly where the ground is already saturated.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **09:00 on Wed, 01st Jan 2014** until **23:59 on Wed, 01st Jan 2014**

Another spell of wet weather is expected to move northeastwards across N Ireland during Wednesday morning and across NW England and Scotland during the afternoon and evening. The rain will become persistent and heavy for a time before clearing away from Scotland on Wednesday night.

With further heavy rain falling on already saturated ground, the public should be aware of the potential for localised flooding.
